### A S Homes Environmental Policy

We live in a time where materials we take for granted will at current use run out in our lifetime.

It is this that makes A S Homes strive for more sustainable ways to build. We must adopt a way of working to prevent pollution, minimise waste and achieve continual improvement in environmental performance.

Our environmental policy is to:

- Achieve an environmental practise throughout our business operations.
- Develop our methods and systems to ensure that resources are used efficiently, waste is minimised and pollution is prevented.
- Comply with or exceed all applicable legal requirements.

This will be achieved by:

- Management setting and communicating high level environmental targets and objectives.
- Monitoring our progress and learning from the results.
- Working to adopt and implement standards for good practice in reducing waste, recycling more and increasing the use of recycled and recovered materials.
- Reporting our process, achievements and weaknesses.
- Educating employees to achieve high standards.
- Reviewing the Environmental Management system and implementing opportunities for continual improvement.

The responsibility for the implementation of this policy lies with the Managing Director.

Paul Kelly  
Managing Director – A S Homes
